Mobility Camp B.C. Geezers, Gimps, Curmudgeons & Cripples

We're a service camp for people with disabilities who need help attending the event. We are a largely clone of Mobility Camp at Burning Man which we joined in 2019, and realized that we didn't need to reinvent the wheel after so many folks had difficulty getting around BitF that year and saw what worked and how to do it for our Regional. We kept the name to honour the mother ship, and so anyone who has been to the one at Burning Man will recognise our mission. If you need power for medical devices like CPAPS etc, or you need to charge a scooter or wheelchair, bring your charger and camp near the action so you don't have to use all your battery getting to the sights & sounds. You sprained, broke a leg or other parts? We help those without a certified disability wherever possible, but we prioritise the worst disabilities first. Thanks to the generosity of GVIAS, there is a shuttle that does regular pickups and drop offs and can be called on for people with mobility issues.

The Grand Orrery

The Grand Orrery is a kinetic sculpture featuring a mechanical model of the solar system under an LED dome. It is 14ft tall x 16ft in diameter with a dome that rests on 8 pillars. As you enter the structure and look up, at the centre of the dome is the focal point – a mechanical model of our solar system. This model contains the sun in the centre , and each of the 8 planets slowly revolving around it. The planets shine from the inside with an iridescent light as they complete their journey around the glowing sun in the centre. The entire model hangs from a dome on which LED strips line the structural arcs and rain down intermittent LED trails and patterns as the backdrop. The visual experience is contemplative and awe inspiring. We provide an ethereal, cozy space with carpets and pillows to rest on as you look up at the cosmos. To create the vibe, we play chill music. This is a community gathering space where all are welcome and we invite community members to host their events.

What If Open Sky Temple

The Temple is the sacred heart of Burning Man, a sanctuary for peace and reflection, opening inward toward stillness away from the event's noise. Inspired by the Korean Sam Tae Guk, the pavilion embodies the harmony of Sky, Earth, and Humanity. Three wings spiral from an open-sky centre: Sky invites imagination, Earth offers grounded rest, Humanity fosters connection. Perforated wood walls filter forest light, uniting sanctuary and landscape. This space invites you to release what no longer serves, whether you seek spiritual connection, quiet rest, or intimate ritual. It holds whatever you bring, from silent offerings to whispered conversation. Temple Guardians are gentle space holders, here if you need us. Sunday night, 9 to 10:30pm, bring friends and sit by our fire. We'll have materials to make a lantern to place around the Temple, until Sky, Earth, and Humanity glow with collective light. Take it home or leave it for others to enjoy through the night. #GVIASGrant
